PROFESSIONAL SUMMARY

Results-driven Junior Data/Business Analyst and Power BI Developer currently pursuing a Bachelor's degree in Data Science at Amity University Dubai. Brings 2 years of professional experience driving operational efficiency in the foodstuff trading and logistics sector. Certified by Google, MedTourEasy, and Learners Point Academy (KHDA Approved). Fueled by professional curiosity and armed with a rigorous problem-solving approach to uncover business root causes using Python, SQL, Advanced Excel, and Power BI.

TECHNICAL CORE COMPETENCIES

- **BI Tools:** Power BI (DAX, Power Query, Modeling), Tableau Desktop
- **Languages & Database:** Python (Pandas, NumPy, Matplotlib), SQL (Queries, Joins, Aggregations), Advanced Excel
- **Data Governance & Quality:** Data Cleansing/Wrangling, Validation, Cross-functional Data Lineage
- **Business Analysis Frameworks:** Business Requirements Document (BRD) Creation, User Acceptance Testing (UAT), 5 Whys Root Cause Analysis, Agile Methodologies
- **Domain Knowledge:** Inventory Metrics, Supply Chain Logistics, Foodstuff Expiry & Stock Rotation (FIFO)

CORE SKILLS

- **Data Pipelines & ETL:** Extracting, transforming, and loading messy supply chain and sales data for analysis.
- **Root Cause Analysis:** Applying the "5 Whys" methodology to drill down into operational issues and identify systemic business problems.
- **Predictive Modeling:** Applying statistical methods and programming algorithms to forecast demand, inventory levels, and customer behavior.

- **Interactive Dashboards:** Designing intuitive Power BI and Tableau reports with advanced DAX formulas.
- **Professional Curiosity:** Driven by an innate curiosity to dig deeper into anomalies, uncover hidden trends, and challenge assumptions within datasets.
- **Business Process Mapping:** Documenting 'as-is' and 'to-be' workflows to eliminate operational bottlenecks.

PROFESSIONAL EXPERIENCE

Junior Data/Business Analyst | 04/2024 – Present (2 Years)

Allfood Foodstuff Trading LLC – Dubai, UAE

- Gathered cross-functional business requirements to design and implement automated Power BI dashboards, eliminating manual data consolidation delays and reducing weekly reporting compilation time by 30%.
- Maintained data governance standards by using Python (Pandas/NumPy) and SQL to clean, transform, and merge fragmented sales and supplier logs, ensuring a 100% reliable baseline for corporate analytics.
- Leveraged the "5 Whys" framework to conduct deep root cause analysis on transportation timelines, successfully identifying a critical supplier communication gap and cutting late logistics deliveries by 18%.
- Developed predictive demand forecasting models in Excel and Python to optimize re-order thresholds for perishable food items, reducing warehouse food waste by 14%.
- Led investigative exploratory data analysis (EDA) driven by operational curiosity to audit system logs against physical invoices, uncovering and fixing a critical logging error to restore complete inventory accuracy.

TECHNICAL PROJECTS

Predictive Analytics: Blood Donation Forecasting | *MedTourEasy*

- Built a predictive machine learning model in Python to forecast blood donation frequencies using historical donor datasets.
- Cleaned erratic data points, performed exploratory data analysis, and utilized statistical algorithms to identify repeat-donor patterns, improving target outreach efficiency.

Interactive BI: Foodstuff Sales & Inventory Lifecycle Performance | *Allfood Foodstuff Trading LLC*

- Engineered an end-to-end Power BI dashboard tracking revenue, product shelf-life, and expiration risks across 1,000+ SKUs.
- Implemented dynamic DAX measures to alert the procurement team on slow-moving inventory, optimizing warehouse space in Al Quoz.

Supply Chain Optimization: Supplier Lead Time Analysis | *Independent Project*

- Used SQL to query and analyze delivery schedules, identifying delivery delays among high-volume foodstuff vendors.

- Presented findings using Tableau storyboards, resulting in renegotiated service level agreements (SLAs) with underperforming suppliers.

EDUCATION & CERTIFICATIONS

EDUCATION

- **Bachelor of Science (B.Sc.) in Data Science (Undergoing)**
Amity University – Dubai, UAE
- **Short-Term Vocational Certification: Business Analyst (KHDA Approved), 03/2026**
Learners Point Academy – Dubai, UAE
Comprehensive training program covering the end-to-end Business Analysis lifecycle. Hands-on experience in requirement gathering, process mapping, and data-driven reporting using SQL, Advanced Excel, Power BI, and Tableau.
- **General Science Diploma (Biology & Chemistry focus)**
GSTS (Ghana Secondary Technical School), Takoradi, Ghana

CERTIFICATIONS

- **Professional Certificate in Business Analysis (KHDA Approved)** – Learners Point Academy, Dubai (2026)
- **Google Data Analytics Professional Certificate** – Coursera
- **Data Analytics Certification** – MedTourEasy
- **Basic Food Safety Certification** – Allfood Foodstuff Trading LLC
- **Secondary School Certificate**

LANGUAGES

- **English:** Fluent
- **Hausa, Twi:** Native

PERSONAL DETAILS

- **Date Of Birth:** 10-02-2002
- **Nationality:** Ghana
- **Gender:** Male
- **Passport No.:** G4126315
- **Exp Date:** 19 MAR 2033
- **Visa Status:** Employment Visa
- **Availability:** Available for immediate joining
